DETAILED ACTION

Allowable Subject Matter

1. Claim 2 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Makino (6,635,935) in view of Kinoshita (5,869,852).

Regarding Claims 1 and 3, Makino discloses a semiconductor device cell having regularly sized and arranged features where in Claims 1, 7, 8 and 14 the required active region, interconnect/wiring region, cell and row configuration are disclosed. Makino fails to disclose the required wiring/interconnect region varying width configuration. However, Kinoshita discloses a semiconductor integrated circuit and semiconductor integrated circuit having layout designed by cell base system where in Columns 6 and 7, the required varying wiring/interconnect region configuration is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required varying wiring/interconnect region

configuration in Makino as taught by Kinoshita in order to have a semiconductor device with ease of manufacture.
